The Voice of Woburn High School

Dedication

We the members of the class of 1975 in recalling our high school years remember in particular one of the Woburn High Staff. In the classroom it has been this person's task to enable each student to realize his maximum educational potential. As a teacher this person has been inspirational and knowledgeable and as a friend always willing to offer advice, guidance, and assistance to students at Woburn High School.

Further it has been this person's responsibility to assure that proper behavior be maintained by the maturing young adults in our school. As Dean of Girls she has expressed a sincere interest in the individual concerns of many students but, in particular, the concerns of the girls. Her warm personality and good humor have been displayed in her enthusiastic involvement in student projects and activities.

In future years as we reminisce upon the past three years at Woburn High School, we will remember you as a warm and dedicated individual, teacher and dean who asserted your concerns for the welfare of our class. The class of 1975 takes extreme pleasure and pride in awarding the 1975 Innitou to you . . .

Doctor Charles Lamontagne
Superintendent

May I extend to aach of you congratulations upon your graduation from Woburn High School with the Class of 1975.

Every year brings new challenges. Although the economic and political strife of our times can be discouraging, the future is always a time of hope. Your efforts in school, family, and church life will now be invaluable in the task of meeting the challenges that make life meaningful. A wise philosopher once remarked, "difficulties mastered are the true opportunities."

I wish each of you every source of good will for you to find your interest in life and to reach your goals. I am proud to have been part of your development thus far and look forward to hearing of your future progress.

Good luck and best wishes to each of you.

Sincerely,

Charles W. Lamontagne

To the members of the Class of 1975:

As we enter the last quarter of the twentieth century and observe in 1975 the bi-centennial of the establishment of our country, we find an unprecedented period in our development as a nation. Inflation and recession have affected the lives of each of us, and a stabilized economy is not in sight.

This economic malaise, the shock from Watergate, the accelerating rate of change in our society have had a profound effect on schools. A new emphasis is being placed on character education and value classification requiring students to make moral judgements and personal reflections on simple considerations such as justice, honesty, truth, concern for our neighbor, and respect for property.

If we are to learn from the moral dilemmas which beset the home, the school, and the nation in the late sixties and early seventies, we must commit ourselves to a re-examination of our objectives. Education must include more than the three R's of reading, writing, and arithmetic.

On the eve of graduation in June, 1975, it is our fervent hope that you will enter the mainstream of society, resolved to make a positive contribution to the ethics of our American way in the final quarter of this century.

May your future bring each of you the peace of mind that comes from a personal concern for the welfare of your neighbors and other simple, positive moral judgements.
